Two Sum

Guided practice · Arrays & Hashing

INTUITION FIRST · 12 min est.

Problem

Given an integer array nums and a target, return indices of the two numbers that add up to target.

Guided checklist

- [ ] Understand input / output
- [ ] Choose the pattern
- [ ] Use starter skeleton
- [ ] Test a tiny example

Plain analogy

Think of a coat-check: remember what you have seen so you can find the matching piece fast.

Last session · auto-resumed

You practiced complement lookup yesterday.

Code editor

```
1  function twoSum(nums, target) {
2    const seen = new Map();
3    // your code here
4  }
```

No full solution shown. Run tests to get a plain-language explanation.

Run Hint Submit

Coach

Stuck for 20+ min?

Nudge the pattern, not the answer.

Pattern recap

Hash map → store prior values, then check the complement.

Skill proof

Recognize complement lookup

Practice later

hash maps stale? verify
